About Me

Motivated and responsible individual with a strong interest in learning new skills and applying them effectively in real-world environments. A dedicated team player with a positive attitude.

PROJECTS

Job Recommendation System

- Developed a Job Recommendation System that suggests relevant jobs based on user skills, preferences, and profile data.
- Implemented filtering and matching logic to improve recommendation accuracy and user experience.

Image based Animal Type Classification for cattle and buffaloes

- Built an image-based classification model to distinguish between cattle and buffaloes using visual features.
- Focused on improving accuracy through feature extraction and model training.

Built an App with Social Community

- Designed and developed a social community application to promote networking and content sharing among users.
- Ensured smooth navigation and interactive user experience.
